## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the restriction of the last Office action is persuasive and, therefore, the restriction requirement is withdrawn. In particular, applicant asserts that Groups I-IV are not patentably distinct. Therefore, Group I, claims 1-9 and 16-26, will be treated as the representative claims for Groups I-IV.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Liu et al (New Fast Algorithms for the Estimation of Block Motion Vectors) for the same reasons as set forth in Section 4 of the last office action, dated 4/25/05.

### ***Response to Arguments***

4. Applicant's arguments filed 7/27/05 have been fully considered but they are not persuasive. In response to applicant's argument on page 2 of the Remarks that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., minimizing a second distortion function) are not recited in the rejected claim(s). Although the claims are interpreted in light of the

specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant also asserts on pages 2-3 of the Remarks that Liu et al fails to disclose determining which of the candidate blocks minimizes a second distortion function. However, Sections III and IV of Liu et al disclose the concept of such sub-block division of the candidate blocks to estimate the motion vectors that reduces the computation when the MAD between the sub-blocks is minimized as in Equation (2).

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
